Vinpower Digital offers new line of Xerox-branded standalone tower duplicators

Vinpower Digital Inc., Los Angeles, Calif., a manufacturer and worldwide supplier of digital duplication equipment, said a new line of Xerox-branded duplicators resulting from the exclusive trademark licensing agreement with **Xerox Corp.**, Stamford, Conn., are now available.

The **Xerox DVD/CD & Blu-ray Duplicators** are manual tower duplicators that range from one to 15 writer drives, each of which operates independently of a PC, providing businesses a quick way to make multiple copies of CDs and DVDs. Each model enables users to transfer image files directly from a PC to the duplicator's internal hard drive, saving users the time and effort usually required to produce a master disc for each project. Several models also provide users with a 256MB buffer memory for more stable and reliable high-speed, duplication with a greatly reduced occurrence of buffer under-run errors.
