## Vinpower Digital announces Industry\'s First Complete Standalone DVD Copy Protection Enabled System

11.02.2010 21:17

category: EDUCATION

This new feature is able to embed copy protection directly onto DVD video material for an added barrier of protection against unwarranted duplication and ripping.

February 11, 2010 -- Vinpower Digital announced today the release of their Copy Protection Software (CPS) technology as an optional add-on to any of their current standalone tower DVD duplicators. The CPS technology allows users the ability to embed copy protection into their original master discs. That master disc can then be transferred onto a Vinpower Digital enabled duplicator and every copy will be produced with copy protection to help prevent the unauthorized reproduction of proprietary video material.

### Copy Protection

The CPS technology is easy to use and is offered as an optional add-on to all DVD duplicators manufactured by Vinpower Digital. The duplicator can be used anywhere there is a suitable electrical outlet without being tied to a computer with these simple steps:

1. Load the supplied CPS software onto a suitable PC.
2. Plug in the CPS USB dangle with activated licenses into your PC's USB socket.
3. Take your DVD video master disc or file and by utilizing the special CPS application, follow the steps to embed the copy protection onto the master content.
4. Transfer the new copy protected master content from the PC onto an enabled duplicator via USB/Copy Connect or LAN/Network connectivity

5. Load blank DVD recordable discs into the duplicator's writer drive(s) then locate the transferred file through the duplicator's menu keys from the internal hard drive
6. Initiate the copy process and when the finished discs all successfully copy, these discs will have the copy protection already embedded.

The user will utilize 1 license for every master project/title they embed with copy protection. The CPS software allows the user to then create as many copies as they want from a single licensed master video image for no additional fees, making the overall costs for every copy protected duplicated disc negligible. The CPS capability is available as an option on various size manual towers and produces all discs simultaneously from 1-to-1 up to 1-to-15 to fit the needs of even the most demanding duplication job.

"The Vinpower Digital CPS application is revolutionary as it's the first copy protection technology that works in a standalone duplication environment and is not reliant on hardware. The CPS is software based, so it allows the user to work with any drive or media on the market and has unparalleled playback capability with no distortion or glitches. Plus the fact that CPS protects against both duplication and ripping, makes this technology a true copy protection as apposed to alternatives,"

proclaims Ryan Swerdloff, VP of Marketing at Vinpower Digital.

In addition to the CPS application, Vinpower Digital duplicator models offer many useful and advanced features like standalone LightScribe or Labelflash printing, Copy Connection, Network capability, dynamic hard drive partitions and the new Simultaneous Load & Copy feature. They still offer exceptional duplication capability at lightning fast speed along with market leading features for which the Vinpower Digital duplicator series have been known, like Account Management, Auto Counter, Multi-language support, Drive firmware upgrade ability, and so much more that helped make Vinpower the preferred duplicator.

**About Vinpower Digital**

Vinpower Digital is the leading manufacturer of standalone optical disc (CD, DVD, Blu-ray) & flash (USB, SD card, Hard Drive) duplication equipment. With our corporate office in Los Angeles, California, USA and production offices in Taipei, Taiwan, we have the ability to deliver the most advanced and reliable standalone CD / DVD / Blu-ray &/or USB / SD / HDD duplication controllers, manual towers, and robotic autoloaders anywhere in the world. As a true manufacture, Vinpower Digital has the ability to OEM/ODM customized applications and equipment for qualified vendors on a number of levels. Never satisfied with good enough, Vinpower Digital constantly pushes the envelope to develop new features and enhance their existing product to stay in tune with the customers' needs and expectations.
